

DESCRIPTION

The AP-type adaptor pieces are destined for direct connection of FDA automatic fire dampers with circular air pipework as Spiro piping (type S), thick-walled commercial marine pipes or bulkhead penetrations (type W) or pipes joined with standardized flanges (type F), pipes or bulkhead penetrations. Customised flanges dimensions on request.

The AP adaptor pieces are made of mild steel. Gasket made of non-combustible material and set of bolts and nuts included. Steel components of adaptor piece painted with marine epoxy paint. Bolts and nuts – galvanized.

Nominal diameters – see Table Types:

- S – for Spiro pipe connection,
- W – for welding to thick-walled pipes,
- F – for flanged pipe connection.

MARKING

Example: AP adaptor piece of nominal DN=125 and of type S: AP 125-S
