

**DESCRIPTION**

The DASL damper is equipped with EPDM gasket on flange. It is designed so as to admit an insulation thickness of up to 50mm. This damper is applicable wherever completely airtight shut-off is not required. The unit's blade can be adjusted on the handle within a range of 0° to 90°. The blade can be locked using a screw.

**DIMENSIONS**

ØD [mm]	Weight [kg]	ØD [mm]	Weight [kg]
80	0.40	280	1.40
100	0.45	300	1.50
125	0.55	315	1.60
140	0.60	355	2.00
150	0.62	400	2.60
160	0.70	450	3.50
180	0.75	500	4.00
200	0.80	560	4.80
223	0.90	600	5.20
